

QR SKILL (blue=research, white=professional)	Course introduced	Course(s) reinforced	Course mastered
Compute Central Tendency / Variability			
Understand Hypothesis testing			
Understand Inferential stats			
Understand / interpret output			
Understand effect size and perform power analysis			
<i>Understand effect size</i>			
Interpret / create tables and figures			
Write analyses in APA format			
<i>Communicate analyses clearly and effectively</i>			
Understand relationship between stats and research methods			
Understand Levels of measurement			

Identify the appropriate test			
Operationalize variables			
Capacity to discuss statistical findings in the context of policy issues			
Able to conduct analysis using statistical software
